Sir:

In reply to the Office Action dated July 24, 2002, the period for reply being extended by the attached Petition for Extension of Time, please amend the above-identified application as follows:

IN THE SPECIFICATION:

Page 12, last paragraph now reads as follows:

B1  
In the present embodiment as described above, the rotation rate is controlled by the timing generator 18 so that the repetition frequency (frame frequency) of the three colored lights of the rotary color filter 12 is equal to or greater than 180 Hz, preferably equal to or greater than 250 Hz, more preferably equal to or greater than 300 Hz. Also, the timing of color image generation of the electro-optical device 14 is set so as to match the generation timing of the respective colored lights.

Page 28, first full paragraph now reads as follows:

B2  
In the present embodiment as described above, the rotation is controlled by the timing generator 208 so that the repetition frequency (frame frequency) of the three colored lights of
